ABOUT ME

Software Engineer with hands-on experience building scalable, responsive web applications using JavaScript, Vue.js, React, Nuxt.js, Python, and FastAPI. Strong in API development, frontend architecture, and test-driven development. Proven ability to design, build, and ship full-stack features with clean code, version control, and modern engineering best practices. Passionate about continuous learning, performance optimization, and building real-world products.

EDUCATION

Abraham Adesanya Polytechnic, Ijebu Igbo

OND Computer Science | 2022-2024

Tech Talent Academy

FRONTEND DEVELOPEMT | 2024-2025

WORK EXPERIENCE

- **Designed and developed a full-stack e-commerce platform using modern web technologies, implementing Supabase for user authentication, role-based access control, and database management.**
- **Built a secure admin dashboard enabling administrators to monitor site activity, manage content, and oversee platform operations.**
- **Collaborated on team-based projects, including a school website, contributing to frontend development, layout implementation, and feature integration.**
- **Developed multiple production-ready websites across different industries, including:**
 - **Hotel and hospitality websites with responsive, user-focused interfaces.**
 - **Professional portfolios for a Materials Engineer, Photographer, and Software Engineer, tailored to client branding and usability requirements.**
- **Built RESTful APIs to handle authentication, data validation, and CRUD operations.**
- **Applied clean code principles, version control with Git/GitHub, and reusable component architecture to ensure maintainability and scalability.**

SKILLS

- Languages: HTML, CSS, JavaScript (ES6+), Python
- Frontend: Vue.js, Nuxt.js, React.js, Responsive Design, Accessibility
- Backend: FastAPI, REST APIs, Supabase
- Engineering Practices: Test Driven Development (TDD), API Design, Debugging
- Tools & Platforms: Git, GitHub, Postman, VS Code
